

Assignment Three Ryan Lebeau
COMP-3220

1. The makePayment() artifact is missing from the figure on slide 12 of B4DomainModeling, its closest relationships are from the cashier and system after enterItem() relating to the customers operation contracts.
2. The artifacts in the fully dressed use case for “Remove Book” helped significantly in the design of this sequence diagram, especially with the relations between :BookOrder and :OrderItemList.
- 3.

4.
